

PROBLEM STATEMENT #10 | Campus & Academic Operations**Student Club Event Ticketing & Budget Portal****1. Problem Context & Overview**

Student clubs require an integrated workflow to submit event proposals, request university budget allocations through approval hierarchies, and generate secure QR-code tickets for attendees.

Target Stakeholders / Actors: *Club Lead, Campus Admin*

2. Sample Functional Requirement (FR) Guideline**Sample Requirement: FR-001 [Priority: High]**

Description: The system shall route event budget proposals through a multi-stage approval workflow (Faculty Coordinator -> Finance Office -> Dean).

Sample Acceptance Criteria: Pass: Status transitions sequentially upon digital sign-off; Fail: Request reaches Dean without finance coordinator sign-off.

3. Sample Non-Functional Requirement (NFR) Guideline**Sample Requirement: NFR-001 [Type: Performance & Security]**

Description: The QR-code ticket scanner API shall validate entry authenticity in under 100 ms at venue check-in points.

Sample Acceptance Criteria: Pass: Benchmarking tests confirm target latency and security standards under simulated peak load.

Deliverables to Submit: [All through a GitHub Repo in your account]**• Complete Requirements Table:**

- >> Exactly 5 Functional Requirements (FR-001 to FR-005)
- >> 2 Non-Functional Requirements (NFR-001 & NFR-002) with ID, Type, Description, Priority, Acceptance Criteria, and Rationale.

• UML Use-Case Diagram:

- >> Model all actors, primary use cases, and include at least one «include» and one «extend» relationship.

• Use-Case Flow Specification:

- >> 1-page document for one core use case detailing Preconditions, Postconditions, Main Success Scenario
- >> One Alternate Flow.
