

PROBLEM STATEMENT #14 | Healthcare & Telemedicine

Corporate Mental Wellness & Counseling Platform

1. Problem Context & Overview

An anonymous enterprise counseling portal allowing employees to assess stress levels, book confidential sessions with licensed therapists, and track personal wellness indicators without employer identity disclosure.

Target Stakeholders / Actors: *Corporate Employee, Licensed Therapist*

2. Sample Functional Requirement (FR) Guideline

Sample Requirement: FR-001 [Priority: High]

Description: The system shall generate an anonymized pseudo-ID for employee accounts to book counseling sessions without revealing corporate email or employee ID to the therapist.

Sample Acceptance Criteria: Pass: Therapist dashboard displays pseudo-ID only; Fail: Employee PII exposed in booking metadata.

3. Sample Non-Functional Requirement (NFR) Guideline

Sample Requirement: NFR-001 [Type: Performance & Security]

Description: The appointment scheduler must handle timezone conversions accurately across global office locations.

Sample Acceptance Criteria: Pass: Benchmarking tests confirm target latency and security standards under simulated peak load.

Deliverables to Submit: [All through a GitHub Repo in your account]

- **Complete Requirements Table:**

- >> Exactly 5 Functional Requirements (FR-001 to FR-005)
- >> 2 Non-Functional Requirements (NFR-001 & NFR-002) with ID, Type, Description, Priority, Acceptance Criteria, and Rationale.

- **UML Use-Case Diagram:**

- >> Model all actors, primary use cases, and include at least one «include» and one «extend» relationship.

- **Use-Case Flow Specification:**

- >> 1-page document for one core use case detailing Preconditions, Postconditions, Main Success Scenario
- >> One Alternate Flow.
