

PROBLEM STATEMENT #51 | Media, Events & Community

Virtual Technical Conference Platform

1. Problem Context & Overview

A technical symposium portal managing double-blind paper reviews, generating conflict-free multi-track presentation schedules, and providing real-time upvoted Q&A queues during sessions.

Target Stakeholders / Actors: *Conference Author, Track Chair*

2. Sample Functional Requirement (FR) Guideline

Sample Requirement: FR-001 [Priority: High]

Description: The system shall anonymize submitted manuscripts (strip author headers and metadata) before assigning them to reviewer pools for double-blind review.

Sample Acceptance Criteria: Pass: Reviewer sees anonymized paper; Fail: Author identity visible to peer reviewer.

3. Sample Non-Functional Requirement (NFR) Guideline

Sample Requirement: NFR-001 [Type: Performance & Security]

Description: The multi-track schedule generator shall resolve session room capacities and speaker availability constraints in under 10 seconds.

Sample Acceptance Criteria: Pass: Benchmarking tests confirm target latency and security standards under simulated peak load.

Deliverables to Submit: [All through a GitHub Repo in your account]

- **Complete Requirements Table:**

- >> Exactly 5 Functional Requirements (FR-001 to FR-005)
- >> 2 Non-Functional Requirements (NFR-001 & NFR-002) with ID, Type, Description, Priority, Acceptance Criteria, and Rationale.

- **UML Use-Case Diagram:**

- >> Model all actors, primary use cases, and include at least one «include» and one «extend» relationship.

- **Use-Case Flow Specification:**

- >> 1-page document for one core use case detailing Preconditions, Postconditions, Main Success Scenario
- >> One Alternate Flow.
